

## **EduSkills**

EduSkills is a national non-profit organization that partners with industry and academia to enhance employability through skill development. It provides certifications, virtual internships, and technology-driven training programs in emerging fields like AI, cloud, cybersecurity, and automation, Ethical Hacking, Data Engineering helping institutions bridge the gap between education and industry needs.

Academic year 2025–2026, the Eduskills programs provided significant benefits to students and faculty by enhancing technical competence, industry readiness, and professional development. Through initiatives such as TechCamps, Centres of Excellence activities, Faculty Development Programs, and events, participants gained hands-on exposure to emerging technologies, improved problem-solving and practical skills, and developed a stronger understanding of current industry trends. Faculty members benefited from FDPs by updating their teaching methodologies and technical knowledge, which in turn improved the overall quality of instruction. Additionally, the programs fostered industry interaction, teamwork, innovation, and career awareness, thereby strengthening employability skills and supporting holistic academic and professional growth.

## **Internships**

EduSkills offers structured virtual internships designed to enhance students' practical skills in emerging technologies. These internships provide real-time industry exposure, hands-on project experience, and globally recognized certifications. They help students build employability, strengthen technical competencies, and gain valuable career insights aligned with current industry demands.
